

CLAIMS

1. A cosmetic composition comprising, in a cosmetically acceptable aqueous medium, at least 0.05% by weight, relative to the total weight of the composition, of one or more unpolymerized or relatively unpolymerized water-soluble organosilicon compounds chosen from organosilanes comprising a silicon atom and organosiloxanes comprising two or three silicon atoms, these organosilicon compounds also comprising at least one basic chemical function and at least two hydrolyzable or hydroxyl groups per molecule, said composition being characterized in that it comprises an amount of a neutralizing agent chosen from sulfuric acid, sulfuric acid salts and mixtures thereof, such that the unpolymerized or relatively unpolymerized organosilicon compounds are neutralized to a proportion of 1/1000 to 99/100 and preferably from 1/100 to 8/10.
2. The cosmetic composition as claimed in claim 1, characterized in that the unpolymerized or relatively unpolymerized water-soluble organosilicon compounds represent at least 0.5% and up to 50% by weight of the composition.
3. The composition as claimed in claim 1 or 2, characterized in that the basic chemical function of the organosilicon compounds is chosen from primary, secondary and tertiary amines.
4. The composition as claimed in any one of claims 1 to 3, characterized in that the hydrolyzable groups are chosen from alkoxy, aryloxy and halogen groups.
5. The cosmetic composition as claimed in any one of the preceding claims, characterized in that the unpolymerized or relatively unpolymerized
